

Environmental and Sustainability Policy

NDC Cleaning Services Ltd is a leading industrial cleaning and infection control company solutions provider.

We take our environmental responsibilities seriously and aim to manage our operations in ways that are environmentally sustainable, economically feasible and socially responsible. We are committed to protecting the environment and operating in a sustainable way to minimise the impact of our activities.

We commit to complying with applicable legal requirements, standards and codes of practice and have established an integrated Quality, Health, Safety and Environmental (QHSE) management system.

Our QHSE management system ensures we are continually enhancing our environmental performance, managing, and reducing any negative environmental impacts and communicating and promoting the positive impacts our solutions have to offer.

To further reduce risk and minimise the impact of our activities, we are continuously researching the best technology and equipment, seeking out new ways of operating to reduce our carbon footprint and reduce waste and selecting the most **eco-friendly materials**.

We will ensure that necessary resources are available to achieve these objectives.

Appendix I – Our Materials

Our Materials

Our *Electrochemical Activation Solution* method uses sodium chloride applied electrostatically.

Academic studies carried out at the University of West of England (UWE) and verified by ECAS gold standard testing, have proven that electrochemically activated solutions such as sodium chloride provide a substantial kill of harmful organisms compared to bleach or alcohol, within seconds.

Electrochemical Activation Solution is an effective and sustainable method of disinfecting harmful bacteria on surfaces.
